Meningitis is deadly, killing and seriously disabling in hours. Small children and young adults are high risk, but all ages can be affected. Globally 1,000 people die daily. We fundraise to invest in research, campaign for vaccines, provide symptom information and support those already affected.

[www.meningitis.org](http://www.meningitis.org)

Maya Ford passed away on the 2<sup>nd</sup> August 2012 from Meningococcal Septicaemia. Maya was just 21 months old. Maya was such a special little girl and the Whiteman family endlessly fundraise for the Meningitis Research Foundation to spread awareness and raise money so that the MRF can move forward in trying to find a cure or prevention, and so that other families do not have to endure the pain and heartbreak that they have been through. So far the Whiteman family have raised over £145,144 and hope to increase this to help with vital research.

Fawkham & District RC have close connections with Maya and we would like to help in a small way.

You can donate straight to Maya's Just Giving page –
